

HOW TO INSTALL CUSTOM MT4 INDICATORS & TEMPLATES

© 2019 - Bernard Ondara

Founder of [Binary Winners Club](#) & [Forex Winners Club](#)

Step 1: If the software is a compressed folder (.zip or .rar), start by decompressing / its contents using a tool like [WinRar](#) or WinZip

Step 2: Copy all the files in the Indicators folder (or any file ending with .ex4 or .mq4) into your MetaTrader4's **Indicator** folder. *Procedure:*

On MT4, Click File> Open Data Folder > MQL4> Indicators. Paste the files here

Step 3: Copy the template file in the Templates folder (or any file ending with .tpl) into your MetaTrader4's Templates folder. *Procedure:*

On MT4, Click File> Open Data Folder > MQL4 > Templates. Paste the file here

Step 4: Restart MT4

Step 5: Right-click on an empty chart on your MT4 and select Templates from the menu. Then click on the correct name of the template file you copied

Step 6: Ensure you are trading from the right time-frame by choosing the timeframe from the tool bar or by right-clicking on the chart then selecting *Timeframes* and then selecting the correct timeframe e.g. M15 for 15 Minutes
